

Earnings Release Conference FY2025

April 30, 2026

Murata Manufacturing Co., Ltd.

FY2025

Earnings Highlights and Topics

President CEO Norio Nakajima

Notice Regarding Unauthorized Access to Our IT Environment

◆ Overview of the Incident

- ✓ On February 28 2026, Murata became aware of the possibility of unauthorized access and initiated an initial investigation, and on March 1, a full-scale investigation was commenced.
- ✓ As a result of these investigations, Murata confirmed that unauthorized access had occurred and that data was improperly accessed.
- ✓ Murata has completed its immediate response to the unauthorized access, and to date, no new damage or impact on business operations has been identified.

◆ Impact on Business Performance and Measures to prevent recurrence

Production Impact	• Murata's systems are operating normally, and Murata's production and sales activities have not been affected. • Murata has not confirmed that any information that may have been obtained as a result of this incident has been made public on the internet, nor has Murata confirmed any secondary damage or unauthorized use of information resulting from this incident.
Scope of Impact	• The data, including personal information, that has, or might have been, unlawfully obtained by a third party is detailed below. Personal information : - Murata employees and people associated with them (including family members and former employees) Approx. 73,000 cases. - People outside of Murata (customers, suppliers, and other stakeholders) Approx. 15,000 cases.
Prevent Recurrence	• Measures Already Implemented : In addition to blocking suspicious communications, enhancing monitoring, and strengthening access, authentication, and permission management, we have expanded our detection capabilities and strengthened our security operations processes • Future Measures : In addition to continuing to strengthen authentication and authorization management, enhancing detection capabilities, and expanding monitoring, we plan to expand external supply chain monitoring as well as third-party evaluations and audits

Highlights of FY2025

Financial Results of FY2025

Revenue 1,830.9 billion yen

- Revenue reached a record high. Revenue from capacitors across a wide range of applications, mainly servers, increased, more than offsetting the decrease in high-frequency modules and multilayer resin substrates for smartphones, resulting in overall revenue was increased .

Operating profit 281.8 billion yen

- Operating profit were up 0.8% year-on-year. Operating profit resulting in an overall revenue increase, driven by gains in capacity utilization from higher production output and by cost reduction efforts, despite product price declines, higher fixed costs, and increased one-time expenses, including goodwill impairment losses.

	Our past initiatives
Challenge1	Pursue differentiated technologies in high-frequency areas and growing market share
Challenge 2	Consistent revenue contribution from the battery business and delivering value in the ESS market
Challenge 3	Acquiring demand for AI server power supplies

Performance Evaluation of Achievement
○Gaining share in high-end smartphone models for the next fiscal year ▲Impairment of goodwill related to the surface acoustic wave filter business
○Battery Business Achieves Profitability (Full-Year Profitability Expected) ○Focusing resources on the PT/OPE, BBU, and ESS markets to drive sales expansion
○We had secured orders for secondary modules for hyperscalers; however, the orders were subsequently dropped due to defects caused by a firmware update.

A Wave of Innovator in Electronics

<Experience a Growth Wave Approx. Every 15 Years>

FY2026 Forward-looking

Projected Financial Results for FY2026(April)

Revenue 1,960.0 billion yen

- Achieved record-high sales for the second consecutive year. Revenue increased by +7.1% year on year, on the back of stronger data-center-related demand, mainly for capacitors.

Operating profit 380.0 billion yen

- Operating profit were up 34.8 % year-on-year, gains in capacity utilization from higher production output driven by stronger data-center-related demand, together with an improved product mix, contributed to profit increased , despite price declines and higher fixed costs.

Capital expenditures 250.0 billion yen

- Total investment is planned to remain at the same level as the previous fiscal year. Although investments in land and buildings declined year on year, capital expenditures increased to meet robust demand for capacitors used in data centers.(Includes approx. 40 billion out of approx. 80 billion in additional production investment.)

Shareholder returns

- The annual dividend has been increased to 70 yen per share (an increase of 5 yen from the previous fiscal year)
- As a shareholder return measure, we plan to execute a share buyback with a maximum limit of 150 billion yen, the largest ever.

Priority initiatives to capture growth in the data center market

① Capacitors ② Power modules

Priority initiatives for FY2026

Topics: Data-center-related earnings outlook for FY2026

<Capacitors>

**Growing demand
for servers**

Server-related Sales
In the Capacitor Sector
Y on Y Change **+85%-90%**

**Small Size and
Large Capacity
Mix Improvement**

Capacitor Sales
Increase in overall ASP
Y on Y Change **+5-10%**

<Power modules>

**Capturing
Business Opportunities**

Growing demand for Servers
Opportunities for new PJT
Projected sales **+25.0 billion yen**

Priority initiatives to capture accelerating growth in data-center-related demand

<Capacitors>

**Implementing approx.
Approx. 80.0 billion yen
in additional capital expenditures**

FY2026: approx. 40 billion yen
FY2027: approx. 40 billion yen

<Power modules>

**Launched sales of multiple
Power Supply products
for data centers**

FY2025

Financial Results Summary and Business Overview

From April , 2025 to March, 2026
Consolidated Basis

Executive Deputy President CFO Masanori
Minamide

Financial Results Overview for FY2025

Year-on-Year Change

- Revenue from capacitors across a wide range of applications, mainly servers, increased, more than offsetting the decrease in high-frequency modules and multilayer resin substrates for smartphones, resulting in overall revenue was increased.
- Operating profit increased, driven by gains in capacity utilization from higher production output and by cost reduction efforts, despite product price declines, higher fixed costs, and increased one-time expenses, including goodwill impairment losses.

	FY2024		FY2025 Projections(February)		FY2025		Y on Y Change		Impact of exchange rate (B JPY)	Constant Currency basis		Change vs Projections (February)

Average exchange rates yen/US dollar	152.57		149.06		150.78		* Exchange rate sensitivity(per 1JPY/US\$ change per year) Revenue : approx. 9 billion yen Operating profit : approx. 1.5 billion yen						

* Exchange rate sensitivity(per 1JPY/US\$ change per year)
Revenue : approx. 9 billion yen
Operating profit ratio : approx. 4.5 billion yen

Quarterly Financial Results

Quarterly Revenue, Order and Backlog

- Total orders for the company increased from the previous quarter. The book-to-bill ratio rose to 1.24.
- Demand related to data centers is growing significantly, coupled with an increase in the valuation of foreign currency-denominated backlogs due to the yen's depreciation.

* Orders = Revenue + Backlogs at the Current Quarter - Backlogs at the Previous Quarter * Backlogs are calculated based on exchange rates as of the end of each quarter
 * Exchange rate against the U.S. dollar: 148.89 yen at the end of September , 156.54 yen at the end of December 2025 , 159.93 yen at the end of March 2026

Revenue by Operating Segments (FY2025)

	FY2024		FY2025		Y on Y Change	
	(B JPY)	(%)	(B JPY)	(%)	(B JPY)	(%)
Capacitors	831.8	47.7	936.4	51.1	+104.6	+12.6
Inductors and EMI filters	201.3	11.5	223.3	12.2	+22.0	+11.0
High-Frequency Device and Communications Module	443.6	25.4	394.8	21.6	(48.8)	(11.0)
Battery and Power supply	155.7	8.9	154.1	8.4	(1.7)	(1.1)
Functional Device	97.8	5.6	107.1	5.9	+9.3	+9.5
Others	13.1	0.9	15.2	0.8	+2.1	+16.0
Revenue	1,743.4	100.0	1,830.9	100.0	+87.5	+5.0

Overview by Segment—Components [FY2024 to FY2025]

Revenue	Capacitors +12.6%	☐ Multilayer ceramic capacitor (MLCC) Increased for servers, smartphones and distributors.
	Inductors and EMI filters +11.0%	☐ Inductors Increased for smartphones and mobility. ☐ EMI suppression filters Increased for servers and mobility.
Operating profit		Operating profit increased year on year due to gains in capacity utilization from higher production output, despite the appreciation of the yen and a decline in product prices. ※The comparison includes the impact of one-time revenue generated in FY2024 and FY2025.

Overview by Segment—Device and Modules [FY2024 to FY2025]

Revenue	High Frequency Device and Communications Module (1 1 . 0 %)	▲High-frequency modules Decreased for smartphones and PCs. ▲Multilayer resin substrates Decreased for smartphones.
	Batteries and Power supply (1 . 1 %)	○Power modules Increased for server. ▲Lithium-ion secondary batteries Decreased for video game consoles and power tools.
	Functional Device + 9 . 5 %	○Sensors Increased for mobility.
Operating profit		In addition to deteriorated profitability in the high frequency device and communications module business due to a decline in revenue, decreased year on year due to impairment losses on goodwill and fixed assets ✕The comparison includes the impact of one-time revenue generated in FY2024 and FY2025.

Revenue by Application (FY2025)

	FY2024		FY2025		Y on Y Change	
	(B JPY)	(%)	(B JPY)	(%)	(B JPY)	(%)
Communication	674.2	38.7	653.0	35.7	(21.2)	(3.1)
Mobility	452.8	26.0	474.5	25.9	+21.7	+4.8
Computers	241.7	13.9	310.4	16.9	+68.7	+28.4
Revenue breakdown — Datacenter- related	106.1	5.8	176.7	9.7	+75.1	+73.9
Home Electronics	142.5	8.2	142.7	7.8	+0.2	+0.1
Industry and Others	232.2	13.2	250.3	13.7	+18.1	+7.8
Revenue	1,743.4	100.0	1,830.9	100.0	+87.5	+5.0

*Based on our estimate. Please note that from FY2025, we will change the scope of revenue classification by purpose to better reflect the actual state of our business.

Breakdown of Operating Profit Changes [FY2024 to FY2025]

*“Production increase” is calculated on the basis of production output excluding the effect of sales price reductions and exchange rate fluctuations.

Inventories Situation

- Inventories as of the end of March 2026 increased 19.3 billion yen compared to the end of the previous quarter.
- Excluding the impact of yen appreciation at the end of the quarter, inventory increased by 16.5 billion yen compared to the end of the previous quarter.

Cash Flows

- Operating cash flow decreased due to a smaller reduction in inventories compared with the same period last year.
- Cash flows from financing activities include share buybacks and dividend payments, as in the same period of the previous fiscal year.

	FY2024	FY2025	Y on Y Change
	(B JPY)	(B JPY)	(B JPY)
Cash flows from operating activities	451.9	425.2	(26.7)
Cash flows from investing activities	(208.1)	(193.8)	+14.3
Cash flows from financing activities	(242.7)	(221.8)	+20.9
Effect of exchange rate changes	2.0	19.0	+16.9
Cash and cash equivalents at end of period	625.1	653.7	+28.6
Free Cash Flows	243.8	231.4	(12.4)
Purchase of property, plant and equipment	(182.9)	(244.6)	(61.7)
Depreciation and amortization	173.3	178.2	+4.9

Projected Financial Results for FY2026

From April 2026 to March 2027

Projections of Demand

- **Smartphones** : Reflecting supply constraints and rising prices for memory semiconductors, mid- and low-end models are expected to decrease by 40 million units year on year. In contrast, the impact on high-end models is expected to remain limited.
- **Vehicles** : Driven by xEV growth, particularly in China, vehicle production is projected to reach approx. 800,000 units year on year.
- **PC** : Decreased 40 million units year on year, reflecting supply constraints and rising prices for memory semiconductors.

	FY2025 Actual	FY2026 Projections	Change
Smartphones (units)	1,240 M	1,200 M	(3%)
therein 5G smartphones	65.7 %	67.5 %	Flat
Vehicles (units)	92.2 M	92.9 M	+1%
therein xEV	42.5 %	49.5 %	+17%
PCs (units)	396 M	360 M	(10%)

* Smartphones and PCs are based on the number of demand for components. Vehicles are based on the number of units produced.

Projected Financial Results for FY2026

Year-on-Year Change

- Revenue reached a record high for the second consecutive period. Plans for higher year-on-year revenue on the back of stronger data-center-related demand, mainly for capacitors.
- Plans for higher operating profit, with gains in capacity utilization from higher production output driven by stronger data-center-related demand, together with an improved product mix, offsetting price declines and higher fixed costs.

	FY2025		FY2026				Y on Y Change		Impact of exchange rate	Constant Currency basis

ROIC (post tax basis) (%)	9.7				12.3		* Exchange rate sensitivity(per 1JPY/US\$ change per year) Revenue : approx. 9 billion yen Operating profit ratio : approx. 4.5 billion yen				
Average exchange rates yen/US dollar	150.78				150.00						

Premises of projected financial results

	Assumptions for projected financial results	Opportunities and Risks not factored into projected financial results
External Environment	- Higher costs from the impact of the Strait of Hormuz - Impact from memory semiconductors already factored in	Sales fluctuations and production risks arising from the Strait of Hormuz not factored in
Revenue	- Significant growth in demand for data-center-related components - Electrification advancing, led by the Greater China region - The decline in product prices has been moderate. - The assumed exchange rate: 150 yen per US\$	- Increased uncertainty in the supply chain and resulting changes in picking up components needs. - Exchange rate fluctuations relative to the assumed rates
Production	- Higher production output driven by demand for data center components - Inventory buildup planned, mainly of components to prepare for future demand growth.	Changes in production plans due to fluctuations in components demand
Cost	- Impact of rising raw material prices - Increased spending including human capital investments and DX-related expenses - Implementing investments to expand production capacity for compact-sized, high-capacity products for data centers	- Rapid fluctuations in raw material prices and energy prices. - Rising production and logistics costs due to inflation and other factors.

Projected Revenue by Operating segments

	FY2025 Actual (B JPY)	FY2026 Projections (B JPY)		FY2026 Projections (B JPY)	Y on Y Change (B JPY) (%)	
		1st Half (B JPY)	2nd Half (B JPY)		(B JPY)	(%)
Capacitors	936.4	522.4	539.2	1,061.7	+125.3	+13.4
Inductors and EMI filters	223.3	115.5	115.8	231.3	+8.0	+3.6
Components	1,159.7	638.0	655.0	1,293.0	+133.3	+11.5
High-Frequency Device and Communications	394.8	187.2	190.7	377.9	(16.9)	(4.3)
Battery and Power supply	154.1	70.2	86.3	156.5	+2.4	+1.6
Functional Device	107.1	56.0	57.9	113.9	+6.8	+6.4
Devices/Module	656.0	313.4	334.9	648.3	(7.6)	(1.2)
Others	15.2	8.1	10.5	18.7	+3.5	+23.2
Total	1,830.9	959.5	1,000.5	1,960.0	+129.1	+7.1

Projected Revenue by Operating segments [FY2025 to FY2026]

Capacitors + 13.4%	○ Multilayer ceramic capacitor (MLCC) Revenue is expected to increase in multilayer ceramic capacitors, driven by strong demand for components for data center applications.
Inductors and EMI filters + 3.6%	○ EMI suppression filters Revenue is expected to increase in EMI suppression filters, mainly for data center and mobility applications.
High Frequency Device and Communications Module (4.3%)	▲ Multilayer resin substrates Revenue is expected to decrease in resin multilayer substrates for smartphone applications.
Batteries and Power supply + 1.6%	○ Power supply Revenue is expected to increase in power supplies for server applications. ▲ Lithium-ion secondary batteries Revenue is expected to decrease in lithium-ion batteries for power tool applications.
Functional Device + 6.4%	○ Actuator Revenue is expected to increase in actuators, driven by growing demand for HDD applications. ○ Sensors • Timing devices Revenue is expected to increase in sensors and timing devices, driven by increasing sensor demand for mobility applications.

Projected Revenue by Application

	FY2025 Actual			FY2026 Projections	Y on Y Change	
	(B JPY)	1st Half (B JPY)	2nd Half (B JPY)	(B JPY)	(B JPY)	(%)
Communication	653.0	317.0	321.9	638.9	(14.1)	(2.2)
Mobility	474.5	239.2	245.9	485.1	+10.6	+2.2
Computers	310.4	210.7	237.9	448.6	+138.2	+44.5
Revenue breakdown — Datacenter-related	176.7	149.1	175.9	325.0	+148.3	+83.9
Home Electronics	142.7	62.2	62.8	125.0	(17.7)	(12.4)
Industry and Others	250.3	130.3	132.1	262.4	+12.1	+4.8
Total	1,830.9	959.5	1,000.5	1,960.0	+129.1	+7.1

* Based on our estimate.

Projected Revenue by Application [FY2025 to FY2026]

Communications (2 . 2 %)	▲ Revenue is expected to decrease in resin multilayer substrates for smartphone applications.
Mobility + 2 . 2 %	○ Revenue is expected to increase in capacitors and sensors for automotive applications.
Computers + 4 4 . 5 %	○ Revenue is expected to increase in capacitors and power modules for data center applications.
Home Electronics (1 2 . 4 %)	▲ Revenue is expected to decrease in lithium-ion batteries for power tool applications.
Industry and Others + 4 . 8 %	○ Revenue is expected to increase mainly in capacitors for distributor channels.

* Based on our estimate.

Production Plan

- FY2026 full-year production is planned at 1,985.0 billion yen (+140.0 billion yen YoY).
- Driven by rising demand for data center components, the component business maintained high utilization rates, particularly for capacitors, and increased company-wide inventories by approx. 25 billion yen.

Breakdown of Operating Profit Changes [FY2025 to FY2026]

*“Production increase” is calculated on the basis of production output excluding the effect of sales price reductions and exchange rate fluctuations.

Breakdown of Operating Profit Changes

[FY26 1st Half Projections to FY26 2nd Half Projections]

* "Production increase" is calculated on the basis of production output excluding the effect of sales price reductions and exchange rate fluctuations.

Projected Financial Results for FY2025

	FY2025 Actual	FY2026 Projections
Depreciation and amortization	178.2 B JPY	178.0 B JPY
R & D expenses	158.9 B JPY	167.0 B JPY
Capital expenditures	247.8 B JPY	250.0 B JPY
Average exchange rate	150.78 JPY/USD	150.00 JPY/USD

Quarterly Financial Results

Shareholder Returns

FY2025 (March 31, 2026) dividends per share

- **Annual dividends increased by 8 yen**
65 JPY per share (Interim: 30 JPY per share, Year-end: 35 JPY per share)

FY2026 (March 31, 2027) projected annual dividends per share

- **Annual dividends increased by 5 yen**
70 JPY per share (Interim: 35 JPY per share, Year-end: 35 JPY per share)

Planned Share Repurchases for FY2026

Plan to execute a share buyback with an upper limit of 150.0 billion yen, the largest in the company's history.

Total number of treasury shares to be acquired: Up to 75.0 million shares

Up to 4.12% of the total number of outstanding shares of stock, excluding treasury stock

Period: From May 11, 2026 to January 29, 2027

Reasons: To enhance capital efficiency (Shares acquired were retired.)

Shares held as of March 31, 2026 continue to be held.

* The above projections are based on our view of the current business environment and our projections for FY2026.

Capital Allocation Progress

Medium-Term
Direction 2027

<Results · Projections>

Capital Expenditures		FY2025 Results	FY2025 Forecast
680 B JPY	▶	247.8 B JPY	250 B JPY

Share Buyback		FY2025 Results	FY2025 Forecast
(—)	▶	100 B JPY	150 B JPY

- ✓ In response to growing data center demand, additional investments in MLCCs will be made for FY2027.
- ✓ To be implemented even if exceeding the MTD level of 680 billion yen

- ✓ To drive discontinuous growth over the long term, we will continue to explore opportunities including environmental investments, IT infrastructure, alliances, and M&A.

- ✓ **Implementation of a dividend increase** aimed at achieving a 5% DOE
⇒FY2026 DOE Projections : 4.6%

- ✓ **Implement share buybacks** to improve capital efficiency.
- ✓ **The shares acquired in this transaction have been immediately retired.**

This report contains forward-looking statements concerning Murata Manufacturing Co., Ltd. and its group companies' projections, plans, policies, strategies, schedules, and decisions. These forward-looking statements are not historical facts; rather, they represent the assumptions of the Murata Group (the “Group”) based on information currently available and certain assumptions we deem as reasonable. Actual results may differ materially from expectations due to various risks and uncertainties. Readers are therefore requested not to rely on these forward-looking statements as the sole basis for evaluating the Group. The Company has no obligation to revise any of the forward- looking statements as a result of new information, future events or otherwise.

Risks and uncertainties that may affect actual results include, but are not limited to, the following: (1) economic conditions of the Company's business environment, and trends, supply-demand balance, and price fluctuations in the markets for electronic devices and components; (2) price fluctuations and insufficient supply of raw materials; (3) exchange rate fluctuations; (4) the Group's ability to provide a stable supply of new products that are compatible with the rapid technical innovation of the electronic components market and to continue to design and develop products and services that satisfy customers; (5) changes in the market value of the Group's financial assets; (6) drastic legal, political, and social changes in the Group's business environment; and (7) other uncertainties and contingencies.

The Company undertakes no obligation to publicly update any forward-looking statements included in this report

Thank you

Revenue by Application Overview [FY2024 to FY2025]

Communication (3 . 1 %)	○ Revenue increased in capacitors and inductors for smartphone applications. ▲ Revenue decreased in high-frequency modules and multilayer resin substrates for smartphones.
Mobility + 4 . 8 %	○ Revenue increased in capacitors, sensors, and inductors for mobility applications.
Computers + 2 8 . 4 %	○ Revenue increased in capacitors and lithium-ion batteries for server applications. ▲ Revenue decreased in high-frequency modules for PCs.
Home Electronics + 0 . 1 %	○ Revenue increased in connectivity modules for AV equipment. ▲ Revenue decreased in lithium-ion batteries and capacitors for video game consoles.
Industry and Others + 7 . 8 %	○ Revenue increased in capacitors for distributor channels, industrial equipment, and the energy market. ▲ Revenue decreased in power modules for distributor channels.

*Based on our estimate. Please note that from FY2025, we will change the scope of revenue classification by purpose to better reflect the actual state of our business. For the purpose of comparing year-on-year changes, the results for FY2024 have been reclassified according to the new classification.

Breakdown of Operating Profit Changes

[FY25 3rd Quarter to FY25 4th Quarter]

(B JPY)

* "Production increase" is calculated on the basis of production output excluding the effect of sales price reductions and exchange rate fluctuations.

Breakdown of Operating Profit Changes

[FY2025 Projection (February 2026) vs FY2025]

*"Production increase" is calculated on the basis of production output excluding the effect of sales price reductions and exchange rate fluctuations.
